

# PRIMEMINI 4

## PRODUCT DATA

RELIABLE,  
SILENT,  
COMPACT,  
MAINTENANCE-FREE,  
POWERFUL.

## The reliable desktop PC

The PrimeMini 4 is equipped with powerful Intel i3, i5 or i7 processors. The Intel vPro technology simplifies the remote maintenance of PCs, allowing hardware and software problems to be solved faster. In combination with Windows 10, the PrimeMini 4 provides a modern platform for productive work.

Thanks to their fanless design, our PrimeMini 4 desktop PCs are completely silent and resistant to dirt and dust. This allows them to be used in environments where conventional PCs struggle to operate for extended periods of time. For example, in dirty industrial production halls or in medical treatment rooms.

If you don't want to place the PrimeMini 4 on a table, the optional VESA bracket makes it easy to mount the device, for example, behind a monitor.

## Individually configurable

The PrimeMini 4 can be configured individually, ensuring you can find the right device for your business. For an office PC a low-cost Intel i3 processor with 8 GB RAM is usually sufficient. If you work professionally with Adobe CC programs, a PrimeMini 4 with a powerful Intel i7 processor, at least 16 GB RAM and a larger SSD hard disk is the right choice.
